

Codebook for Technocracy, Populism, Democracy – Project

University of Mannheim, Chair of European Politics

November 6, 2024

Introduction

This codebook provides an overview of the variables included in the survey conducted as part of the research project titled **Technocracy, Populism, Democracy - Project**. The study, led by the Chair of European Politics at the University of Mannheim under the direction of Prof. Dr. Thomas König, gathered data from over 20,000 respondents across 16 countries. The primary aim was to explore the interplay between populist, technocratic, and democratic attitudes and how these shape political preferences, governance perceptions, and societal divisions. The project's core objective is to identify the latent dimensions of political attitudes toward these governance models and to explore their societal implications. By analyzing preferences for sources of legitimacy, problem-solving approaches, and leadership in political decision-making, the survey aims to contribute to the understanding of how these attitudes influence social trust and democratic institutions. Empirically, the study expands its scope by including diverse political contexts, ranging from European countries to Argentina, Brazil, Turkey, and the United States. Methodologically, it employs item response models and a novel combination of conjoint analysis with a trust game, offering insights into the reciprocity and trust dynamics essential for democratic functioning. This codebook details each survey variable, providing clarity for data interpretation and analysis, and serves as a foundational resource for researchers examining contemporary challenges to democracy and governance worldwide.

Survey Methodology

In the summer of 2022, we surveyed adults in sixteen countries across Europe, North America, and South America, including Argentina, Austria, Brazil, the Czech Republic, France, Germany, Greece, Hungary, Ireland, Italy, Spain, Sweden, Turkey, the United Kingdom, and the United States. The sample in each country represented the adult population (ages 18 and older) and maintained a balanced gender distribution to capture a broad range of societal perspectives. Conducted online, the survey asked respondents

about their attitudes toward technocracy, populism, and democracy, along with demographic information. Additionally, a conjoint experiment, paired with a trust game, presented respondents with hypothetical political profiles featuring varying populist, technocratic, and democratic statements to measure societal trust and reciprocity. This approach allowed us to create a dataset that highlights both shared and unique political views across diverse societies, supporting the goals of the Technocracy, Populism, Democracy Project.

Variable Overview

The following sections detail each variable included in the dataset, organized by category. This structured approach allows for a systematic examination of the survey data and supports the analytical objectives of the Technocracy, Populism, Democracy Project.

Overview of Variables

Question Number	Question Title
ResponseId	Response-ID
ctry	Country
pop1	Will of the People
pop2	Problems Solved by the People
pop3	People's Role in Policy Decisions
pop4	Politics as a Struggle
pop5	Compromise in Politics
pop6	Immediate Demands of the People
tec1	Independent Expertise
tec2	Expert Problem-Solving
tec3	Experts in Policy Decisions
tec4	Objective Solutions
tec5	Compromise in Policy Solutions
tec6	Long-Term Needs
dem1	Compromise among Viewpoints
dem2	Solutions by Political Representatives
dem3	Representatives in Policy Decisions
dem4	Competition of Political Ideas
dem5	Compromise and Listening
dem6	Balance in Political Demands
gender	Gender
citizen	Citizenship
surv_att_check	Survey Attention Check
game_instr_check	Game Instruction Check
age	Age
demimp	Importance of Democratic Governance
demlvl	Perceived Level of Democratic Governance
eco1	Full Compensation for Price Increases
eco2	Partial Compensation for Price Increases
eco3	No Compensation for Price Increases
immi1	Mandatory Integration Programs
immi2	Optional Integration Programs
immi3	No Integrations Programs
env1	Strong Climate Action
env2	Moderate Climate Action
env3	No Climate Action
cul1	Ban Religious Symbols

Continued on next page

Continued from previous page

Question Number	Question Title
cul2	Regulate Religious Symbols
cul3	No Constraints on Religious Symbols
ecorate	Importance of Economic Policy
immirate	Importance of Immigration Policy
envrate	Importance of Environmental Policy
culrate	Importance of Cultural Policy
lrscale	Left-Right Self-Placement Scale
c1me	Tokens Allocated to Respondent (Compared to Person 1)
c1p	Tokens Allocated to Person 1
c2me	Tokens Allocated to Respondent (Compared to Person 2)
c2p	Tokens Allocated to Person 2
c3me	Tokens Allocated to Respondent (Compared to Person 3)
c3p	Tokens Allocated to Person 3
p1temp	Feeling Thermometer (Person 1)
p2temp	Feeling Thermometer (Person 2)
p3temp	Feeling Thermometer (Person 3)
p1a	Right to Express Opinion (Person 1)
p1b	Right to Run for Office (Person 1)
p1c	Publish Op-Eds (Person 1)
p1d	Neighborhood Acceptance (Person 1)
p1e	Boss Acceptance (Person 1)
p1f	Family Acceptance (Person 1)
p1g	Respect for Opinion (Person 1)
p2a	Right to Express Opinion (Person 2)
p2b	Right to Run for Office (Person 2)
p2c	Publish Op-Eds (Person 2)
p2d	Neighborhood Acceptance (Person 2)
p2e	Boss Acceptance (Person 2)
p2f	Family Acceptance (Person 2)
p2g	Respect for Opinion (Person 2)
p3a	Right to Express Opinion (Person 3)
p3b	Right to Run for Office (Person 3)
p3c	Publish Op-Eds (Person 3)
p3d	Neighborhood Acceptance (Person 3)
p3e	Boss Acceptance (Person 3)
p3f	Family Acceptance (Person 3)
p3g	Respect for Opinion (Person 3)
instidim1_round1	Decision-Maker Preference (Round 1)
instidim1_round2	Decision-Maker Preference (Round 2)

Continued on next page

Continued from previous page

Question Number	Question Title
instidim1_round3	Decision-Maker Preference (Round 3)
instidim2_round1	Basis of Political Decisions (Round 1)
instidim2_round2	Basis of Political Decisions (Round 2)
instidim2_round3	Basis of Political Decisions (Round 3)
instidim3_round1	Temporal Focus of Policy (Round 1)
instidim3_round2	Temporal Focus of Policy (Round 2)
instidim3_round3	Temporal Focus of Policy (Round 3)
instidim4_round1	Political Conflict or Objectivity (Round 1)
instidim4_round2	Political Conflict or Objectivity (Round 2)
instidim4_round3	Political Conflict or Objectivity (Round 3)
policydim1_round1	State Compensation Preference (Round 1)
policydim1_round2	State Compensation Preference (Round 2)
policydim1_round3	State Compensation Preference (Round 3)
policydim2_round1	Integration Program Preference (Round 1)
policydim2_round2	Integration Program Preference (Round 2)
policydim2_round3	Integration Program Preference (Round 3)
policydim3_round1	Environmental Action Preference (Round 1)
policydim3_round2	Environmental Action Preference (Round 2)
policydim3_round3	Environmental Action Preference (Round 3)
policydim4_round1	Religious Symbol Regulation Preference (Round 1)
policydim4_round2	Religious Symbol Regulation Preference (Round 2)
policydim4_round3	Religious Symbol Regulation Preference (Round 3)
party_close	Political Party Affiliation
party_distant	Political Party Distance
divparty	Perceived Division among Political Parties
divciti	Perceived Division among Citizens
owneco	Perception of Household Economic Situation
countryeco	Perception of National Economic Situation
eff1	Perceived Understanding of Political Issues
eff2	Perceived Political Representation
eff3	Perceived Influence on Government Action
polint	Political Interest
edulvl	Education Level
class	Self-Perceived Social Class
area	Area of Residence
relig	Religious Affiliation

Detailed Variable Information

Variable: Response ID

Variable Name: ResponseId

Description: This variable provides a unique identifier for each respondent in the dataset. Each 'ResponseId' is personalized and uniquely assigned to an individual respondent, ensuring data integrity and respondent anonymity.

Coding:

- Each respondent has a unique alphanumeric ID.

Variable: Country

Variable Name: ctry

Description: This variable categorizes respondents by their country of residence, grouping them into one of 16 countries in the study. This allows for cross-national comparisons and analysis based on country-specific responses.

Question Text:

"In which country do you currently reside?"

Coding:

- Respondents are grouped into one of the following 16 countries:
 - Argentina
 - Austria
 - Brazil
 - Czech Republic
 - France
 - Germany
 - Greece
 - Hungary
 - Ireland
 - Italy
 - Poland
 - Spain
 - Sweden
 - Turkey
 - United Kingdom
 - United States

Variable: Will of the People

Original Question: Q7_1

Category: Populist Attitudes

Variable Name: pop1

Description: This variable assesses respondents' views on whether good political decisions should align with the will of the people.

Question Text:

"Good political decisions should be based on the will of the people."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Problems Solved by the People

Original Question: Q7_2

Category: Populist Attitudes

Variable Name: pop2

Description: This variable assesses the belief that the problems facing the respondent's country can be solved by the people.

Question Text:

"The problems facing my country can be solved by the people."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: People's Role in Policy Decisions

Original Question: Q7_3

Category: Populist Attitudes

Variable Name: pop3

Description: This variable measures the extent to which respondents believe that people should make the most important policy decisions.

Question Text:

"The people should make our most important policy decisions."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Politics as a Struggle

Original Question: Q7_4

Category: Populist Attitudes

Variable Name: pop4

Description: This variable reflects the belief that politics is ultimately a struggle between good and evil.

Question Text:

"Politics is ultimately a struggle between good and evil."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Compromise in Politics

Original Question: Q7_5

Category: Populist Attitudes

Variable Name: pop5

Description: This variable measures the belief that compromise in politics is equivalent to selling out on one's principles.

Question Text:

"Compromise in politics is really just selling out on one's principles."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Immediate Demands of the People

Original Question: Q7_6

Category: Populist Attitudes

Variable Name: pop6

Description: This variable gauges the opinion that politics should reflect the immediate demands of the people.

Question Text:

"Politics should reflect the immediate demands of the people."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Independent Expertise

Original Question: Q9_1

Category: Technocratic Attitudes

Variable Name: tec1

Description: This variable reflects the belief that good political decisions should be based on independent expertise.

Question Text:

"Good political decisions should be based on independent expertise."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Expert Problem-Solving

Original Question: Q9_2

Category: Technocratic Attitudes

Variable Name: tec2

Description: This variable gauges the opinion that the country's problems require experts to solve them.

Question Text:

"The problems facing my country require experts to solve them."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Experts in Policy Decisions

Original Question: Q9_3

Category: Technocratic Attitudes

Variable Name: tec3

Description: This variable measures the belief that experts should make the most important policy decisions.

Question Text:

"Experts should make our most important policy decisions."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Objective Solutions

Original Question: Q9_4

Category: Technocratic Attitudes

Variable Name: tec4

Description: This variable reflects the view that politics is about finding objective solutions best for the country.

Question Text:

"Politics is ultimately about finding objective solutions that are best for the country."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Compromise in Politics

Original Question: Q9_5

Category: Technocratic Attitudes

Variable Name: tec5

Description: This variable measures the belief that compromise hinders the search for optimal policy solutions.

Question Text:

"Compromise in politics hinders the search for optimal policy solutions."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Long-Term Needs

Original Question: Q9_6

Category: Technocratic Attitudes

Variable Name: tec6

Description: This variable captures the belief that politics should reflect the long-term needs of the country.

Question Text:

"Politics should reflect the long-term needs of the country."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Compromise among Viewpoints

Original Question: Q11_1

Category: Democratic Attitudes

Variable Name: dem1

Description: This variable assesses the belief that good political decisions should be based on compromise among differing viewpoints.

Question Text:

"Good political decisions should be based on compromise among differing viewpoints."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Solutions by Political Representatives

Original Question: Q11_2

Category: Democratic Attitudes

Variable Name: dem2

Description: This variable measures the belief that the problems facing the country can be solved by political representatives.

Question Text:

"The problems facing my country can be solved by political representatives."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Representatives in Policy Decisions

Original Question: Q11_3

Category: Democratic Attitudes

Variable Name: dem3

Description: This variable gauges the opinion that political representatives should make the most important policy decisions.

Question Text:

"Political representatives should make our most important policy decisions."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Competition of Political Ideas

Original Question: Q11_4

Category: Democratic Attitudes

Variable Name: dem4

Description: This variable assesses the belief that politics is ultimately about competition between political ideas.

Question Text:

"Politics is ultimately about competition between political ideas."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Compromise and Listening

Original Question: Q11_5

Category: Democratic Attitudes

Variable Name: dem5

Description: This variable captures the belief that compromise in politics requires listening to the opinions of other groups.

Question Text:

"Compromise in politics requires listening to the opinions of other groups."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Balance in Political Demands

Original Question: Q11_6

Category: Democratic Attitudes

Variable Name: dem6

Description: This variable assesses the view that politics should balance the immediate demands of the people and the long-term needs of the country.

Question Text:

"Politics should balance the immediate demands of the people and the long-term needs of the country."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Gender

Original Question: Q2

Category: Demographics

Variable Name: gender

Description: This variable records respondents' self-identified gender.

Question Text:

"Please indicate your gender."

Coding:

- 0: Male
- 1: Female
- 2: Other

Variable: Citizenship

Original Question: Q4

Category: Demographics

Variable Name: citizen

Description: This variable records whether the respondent is a citizen of the country in which the survey was conducted.

Question Text:

"Are you a citizen of [country]?"

Coding:

- 0: No
- 1: Yes

Variable: Survey Attention Check

Original Question: Q5

Category: Quality Control

Variable Name: surv_att_check

Description: This variable records whether the respondent followed the instruction to ignore the next question and write "I read the instructions."

Question Text:

"In order to demonstrate that you have read instructions, please ignore the next question, and simply write 'I read the instructions' in the box labeled 'Others'."

Coding:

- 0: No
- 1: Yes

Variable: Game Instruction Check

Original Question: Q31

Category: Quality Control

Variable Name: game_instr_check

Description: This variable verifies if the respondent correctly answered the instructional question regarding tokens.

Question Text:

"You start with 10 Tokens. Suppose you give 5 tokens to the other person. How many tokens will the other person receive?"

Coding:

- 0: No
- 1: Yes

Variable: Age

Original Question: Q3

Category: Demographics

Variable Name: age

Description: This variable captures respondents' age in years.

Question Text:

"How old are you?"

Coding: Numeric value indicating age in years (18 to 99).

Variable: Importance of Democratic Governance

Original Question: Q12

Category: Governance Preferences

Variable Name: demimp

Description: This variable measures how important it is for the respondent to live in a country that is governed democratically.

Question Text:

"How important is it for you to live in a country that is governed democratically?"

Coding:

- 1: Not at all important
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10: Absolutely important

Variable: Perceived Level of Democratic Governance

Original Question: Q13

Category: Governance Perception

Variable Name: demlvl

Description: This variable assesses how democratically the respondent believes their country is being governed.

Question Text:

"How democratically is this country being governed today?"

Coding:

- 1: Not at all democratic
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10: Completely democratic

Variable: Full Compensation for Price Increases

Original Question: Q15_1

Category: Economic Policy Preferences

Variable Name: eco1

Description: This variable assesses the opinion on whether the state should fully compensate companies and households for higher prices.

Question Text:

"The state should fully compensate companies and households for higher prices."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Partial Compensation for Price Increases

Original Question: Q15_2

Category: Economic Policy Preferences

Variable Name: eco2

Description: This variable assesses the opinion on whether the state should partly compensate companies and households for higher prices.

Question Text:

"The state should partly compensate companies and households for higher prices."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: No Compensation for Price Increases

Original Question: Q15_3

Category: Economic Policy Preferences

Variable Name: eco3

Description: This variable assesses the opinion on whether the state should not compensate companies and households for higher prices.

Question Text:

"The state should not have to compensate companies and households for higher prices."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Mandatory Integration Programs

Original Question: Q17_1

Category: Immigration Policy Preferences

Variable Name: immi1

Description: This variable assesses the opinion on whether the state should make integration programs mandatory for immigrants.

Question Text:

"The state should make integration programs mandatory for immigrants."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Optional Integration Programs

Original Question: Q17_2

Category: Immigration Policy Preferences

Variable Name: immi2

Description: This variable assesses the opinion on whether the state should make integration programs optional for immigrants.

Question Text:

"The state should make integration programs optional for immigrants."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: No Integration Programs

Original Question: Q17_3

Category: Immigration Policy Preferences

Variable Name: immi3

Description: This variable assesses the opinion on whether the state should provide no integration programs for immigrants.

Question Text:

"The state should provide no integration programs for immigrants."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Strong Climate Action

Original Question: Q19_1

Category: Environmental Policy Preferences

Variable Name: env1

Description: This variable assesses the belief that the state should take strong action to reduce climate change.

Question Text:

"The state should take strong action to reduce climate change."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Moderate Climate Action

Original Question: Q19_2

Category: Environmental Policy Preferences

Variable Name: env2

Description: This variable assesses the belief that the state should take moderate action to reduce climate change.

Question Text:

"The state should take moderate action to reduce climate change."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: No Climate Action

Original Question: Q19_3

Category: Environmental Policy Preferences

Variable Name: env3

Description: This variable assesses the belief that the state should not take any action to reduce climate change.

Question Text:

"The state should not take any action to reduce climate change."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Ban Religious Symbols

Original Question: Q21_1

Category: Cultural Policy Preferences

Variable Name: cul1

Description: This variable assesses the belief that the state should ban religious symbols from the public space.

Question Text:

"The state should ban religious symbols from the public space."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Regulate Religious Symbols

Original Question: Q21_2

Category: Cultural Policy Preferences

Variable Name: cul2

Description: This variable assesses the belief that the state should regulate religious symbols in the public space.

Question Text:

"The state should regulate religious symbols in the public space."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: No Constraints on Religious Symbols

Original Question: Q21_3

Category: Cultural Policy Preferences

Variable Name: cul3

Description: This variable assesses the belief that the state should not constrain religious symbols in the public space.

Question Text:

"The state should not constrain religious symbols in the public space."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Importance of Economic Policy

Original Question: Q23_1

Category: Policy Importance Ratings

Variable Name: ecorate

Description: This variable measures the importance the respondent assigns to economic policy issues.

Question Text:

"Thinking about the policy issues you just rated, how important do you consider each one? – Economic policy"

Coding:

- 1: Not at all important
- 2: Not too important
- 3: Fairly important
- 4: Extremely important

Variable: Importance of Immigration Policy

Original Question: Q23_2

Category: Policy Importance Ratings

Variable Name: immirate

Description: This variable measures the importance the respondent assigns to immigration policy issues.

Question Text:

"Thinking about the policy issues you just rated, how important do you consider each one? – Immigration policy"

Coding:

- 1: Not at all important
- 2: Not too important
- 3: Fairly important
- 4: Extremely important

Variable: Importance of Environmental Policy

Original Question: Q23_3

Category: Policy Importance Ratings

Variable Name: envrate

Description: This variable measures the importance the respondent assigns to environmental policy issues.

Question Text:

"Thinking about the policy issues you just rated, how important do you consider each one? – Environmental policy"

Coding:

- 1: Not at all important
- 2: Not too important
- 3: Fairly important
- 4: Extremely important

Variable: Importance of Cultural Policy

Original Question: Q23_4

Category: Policy Importance Ratings

Variable Name: culrate

Description: This variable measures the importance the respondent assigns to cultural policy issues.

Question Text:

"Thinking about the policy issues you just rated, how important do you consider each one? – Cultural policy"

Coding:

- 1: Not at all important
- 2: Not too important
- 3: Fairly important
- 4: Extremely important

Variable: Left-Right Self-Placement Scale

Original Question: Q25

Category: Political Orientation

Variable Name: lrscale

Description: This variable measures the respondent's self-placement on a left-right political scale.

Question Text:

"In politics, people often talk about left and right. When you use this scale, where would you locate yourself, when 1 means 'left' and 11 means 'right'?"

Coding:

- 1: Left
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11: Right

Variable: Tokens Allocated to Respondent (Compared to Person 1)

Original Question: Q34_1

Category: Conjoint Experiment - Token Allocation

Variable Name: c1me

Description: This variable indicates the number of tokens the respondent receives in comparison to Person 1.

Question Text:

"How many tokens do I receive compared to Person 1?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Tokens Allocated to Person 1

Original Question: Q34_2

Category: Conjoint Experiment - Token Allocation

Variable Name: c1p

Description: This variable records the number of tokens allocated to Person 1.

Question Text:

"How many tokens does Person 1 receive?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Tokens Allocated to Respondent (Compared to Person 2)

Original Question: Q36_1

Category: Conjoint Experiment - Token Allocation

Variable Name: c2me

Description: This variable indicates the number of tokens the respondent receives in comparison to Person 2.

Question Text:

"How many tokens do I receive compared to Person 2?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Tokens Allocated to Person 2

Original Question: Q36_2

Category: Conjoint Experiment - Token Allocation

Variable Name: c2p

Description: This variable records the number of tokens allocated to Person 2.

Question Text:

"How many tokens does Person 2 receive?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Tokens Allocated to Respondent (Compared to Person 3)

Original Question: Q38_1

Category: Conjoint Experiment - Token Allocation

Variable Name: c3me

Description: This variable indicates the number of tokens the respondent receives in comparison to Person 3.

Question Text:

"How many tokens do I receive compared to Person 3?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Tokens Allocated to Person 3

Original Question: Q38_2

Category: Conjoint Experiment - Token Allocation

Variable Name: c3p

Description: This variable records the number of tokens allocated to Person 3.

Question Text:

"How many tokens does Person 3 receive?"

Coding:

- 0: No Tokens
- 1 to 9: Number of Tokens
- 10: All Tokens

Variable: Feeling Thermometer (Person 1)

Original Question: Q41_1

Category: Feeling Thermometer

Variable Name: pltemp

Description: This variable assesses the respondent's feelings towards Person 1 on a scale from 0 (coldest) to 100 (warmest).

Question Text:

"On a scale from 0 (coldest) to 100 (warmest), how do you feel about Person 1?"

Coding:

- 0: Coldest
- 10
- 20
- 30
- 40
- 50
- 60
- 70
- 80
- 90
- 100: Warmest

Variable: Feeling Thermometer (Person 2)

Original Question: Q44_1

Category: Feeling Thermometer

Variable Name: p2temp

Description: This variable assesses the respondent's feelings towards Person 2 on a scale from 0 (coldest) to 100 (warmest).

Question Text:

"On a scale from 0 (coldest) to 100 (warmest), how do you feel about Person 2?"

Coding:

- 0: Coldest
- 10
- 20
- 30
- 40
- 50
- 60
- 70
- 80
- 90
- 100: Warmest

Variable: Feeling Thermometer (Person 3)

Original Question: Q47_1

Category: Feeling Thermometer

Variable Name: p3temp

Description: This variable assesses the respondent's feelings towards Person 3 on a scale from 0 (coldest) to 100 (warmest).

Question Text:

"On a scale from 0 (coldest) to 100 (warmest), how do you feel about Person 3?"

Coding:

- 0: Coldest
- 10
- 20
- 30
- 40
- 50
- 60
- 70
- 80
- 90
- 100: Warmest

Variable: Right to Express Opinion (Person 1)

Original Question: Q40_1

Category: Opinion on Person 1

Variable Name: pla

Description: This variable captures the respondent's view on whether Person 1 has the right to express their opinion.

Question Text:

"This person has the right to express his or her opinion."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Run for Office (Person 1)

Original Question: Q40_2

Category: Opinion on Person 1

Variable Name: p1b

Description: This variable captures the respondent's view on whether Person 1 should be allowed to run for a political office.

Question Text:

"This person should be allowed to run in an election for a political office."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Publish Op-Eds (Person 1)

Original Question: Q40_3

Category: Opinion on Person 1

Variable Name: p1c

Description: This variable captures the respondent's view on whether newspapers should publish op-eds by Person 1.

Question Text:

"Newspapers should publish op-eds by this person."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Neighborhood Acceptance (Person 1)

Original Question: Q40_4

Category: Opinion on Person 1

Variable Name: p1d

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 1 living in their neighborhood.

Question Text:

"If this person lived in your neighborhood, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Boss Acceptance (Person 1)

Original Question: Q40_5

Category: Opinion on Person 1

Variable Name: ple

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 1 as their boss.

Question Text:

"If this person became your boss, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Family Acceptance (Person 1)

Original Question: Q40_6

Category: Opinion on Person 1

Variable Name: p1f

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 1 as a family member if their child wanted to marry this person.

Question Text:

"If you had a child who wanted to marry this person, you would find it difficult to accept him or her in your family."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Respect for Opinion (Person 1)

Original Question: Q40_7

Category: Opinion on Person 1

Variable Name: plg

Description: This variable captures the respondent's view on whether Person 1 would respect their right to express their opinion in public.

Question Text:

"This person would respect your right to express your opinion in public."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Express Opinion (Person 2)

Original Question: Q43_1

Category: Opinion on Person 2

Variable Name: p2a

Description: This variable captures the respondent's view on whether Person 2 has the right to express his or her opinion.

Question Text:

"This person has the right to express his or her opinion."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Run for Political Office (Person 2)

Original Question: Q43_2

Category: Opinion on Person 2

Variable Name: p2b

Description: This variable captures the respondent's view on whether Person 2 should be allowed to run in an election for a political office.

Question Text:

"This person should be allowed to run in an election for a political office."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Publish Op-Eds (Person 2)

Original Question: Q43_3

Category: Opinion on Person 2

Variable Name: p2c

Description: This variable captures the respondent's view on whether newspapers should publish op-eds by Person 2.

Question Text:

"Newspapers should publish op-eds by this person."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance in Neighborhood (Person 2)

Original Question: Q43_4

Category: Opinion on Person 2

Variable Name: p2d

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 2 living in their neighborhood.

Question Text:

"If this person lived in your neighborhood, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance as Boss (Person 2)

Original Question: Q43_5

Category: Opinion on Person 2

Variable Name: p2e

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 2 as their boss.

Question Text:

"If this person became your boss, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance of Marriage in Family (Person 2)

Original Question: Q43_6

Category: Opinion on Person 2

Variable Name: p2f

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 2 as part of their family if their child wanted to marry them.

Question Text:

"If you had a child who wanted to marry this person, you would find it difficult to accept him or her in your family."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Respect for Right to Express Opinion (Person 2)

Original Question: Q43_7

Category: Opinion on Person 2

Variable Name: p2g

Description: This variable captures the respondent's view on whether Person 2 would respect their right to express their opinion in public.

Question Text:

"This person would respect your right to express your opinion in public."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Express Opinion (Person 3)

Original Question: Q46_1

Category: Opinion on Person 3

Variable Name: p3a

Description: This variable captures the respondent's view on whether Person 3 has the right to express his or her opinion.

Question Text:

"This person has the right to express his or her opinion."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Run for Political Office (Person 3)

Original Question: Q46_2

Category: Opinion on Person 3

Variable Name: p3b

Description: This variable captures the respondent's view on whether Person 3 should be allowed to run in an election for a political office.

Question Text:

"This person should be allowed to run in an election for a political office."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Right to Publish Op-Eds (Person 3)

Original Question: Q46_3

Category: Opinion on Person 3

Variable Name: p3c

Description: This variable captures the respondent's view on whether newspapers should publish op-eds by Person 3.

Question Text:

"Newspapers should publish op-eds by this person."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance in Neighborhood (Person 3)

Original Question: Q46_4

Category: Opinion on Person 3

Variable Name: p3d

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 3 living in their neighborhood.

Question Text:

"If this person lived in your neighborhood, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance as Boss (Person 3)

Original Question: Q46_5

Category: Opinion on Person 3

Variable Name: p3e

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 3 as their boss.

Question Text:

"If this person became your boss, you would find it difficult to accept."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Acceptance of Marriage in Family (Person 3)

Original Question: Q46_6

Category: Opinion on Person 3

Variable Name: p3f

Description: This variable captures the respondent's view on whether they would find it difficult to accept Person 3 as part of their family if their child wanted to marry them.

Question Text:

"If you had a child who wanted to marry this person, you would find it difficult to accept him or her in your family."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Respect for Right to Express Opinion (Person 3)

Original Question: Q46_7

Category: Opinion on Person 3

Variable Name: p3g

Description: This variable captures the respondent's view on whether Person 3 would respect their right to express their opinion in public.

Question Text:

"This person would respect your right to express your opinion in public."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Decision-Maker Preference (Round 1)

Original Question: Q28_3

Category: Political Attitudes – Decision-Maker Preference

Variable Name: instidim1_round1

Description: This variable captures respondents' preferences regarding who should make important policy decisions: the people or experts. It is designed to measure populist versus technocratic orientations in decision-making authority.

Question Text:

"Who should make important political decisions?"

Coding:

- 0: unknown!
- 1: Important policy decisions should be made by the people (populist preference)
- 2: Important policy decisions should be made by experts (technocratic preference)

Variable: Decision-Maker Preference (Round 2)

Original Question: Q28_3

Category: Political Attitudes – Decision-Maker Preference

Variable Name: instidim1_round2

Description: This variable captures respondents' preferences regarding who should make important policy decisions: the people or experts. It is designed to measure populist versus technocratic orientations in decision-making authority in the second round of responses.

Question Text:

"Who should make important political decisions?"

Coding:

- 0: unknown!
- 1: Important policy decisions should be made by the people (populist preference)
- 2: Important policy decisions should be made by experts (technocratic preference)

Variable: Decision-Maker Preference (Round 3)

Original Question: Q28_3

Category: Political Attitudes – Decision-Maker Preference

Variable Name: instidim1_round3

Description: This variable captures respondents' preferences regarding who should make important policy decisions: the people or experts. It is designed to measure populist versus technocratic orientations in decision-making authority in the third round of responses.

Question Text:

"Who should make important political decisions?"

Coding:

- 0: unknown!
- 1: Important policy decisions should be made by the people (populist preference)
- 2: Important policy decisions should be made by experts (technocratic preference)

Variable: Basis of Political Decisions (Round 1)

Original Question: Q28_4

Category: Political Attitudes – Basis of Decision-Making

Variable Name: instidim2_round1

Description: This variable captures respondents' views on the foundation of good political decisions, distinguishing between the will of the people and independent expertise. It reflects populist versus technocratic attitudes towards decision-making in the first round.

Question Text:

"On what basis should good political decisions be made?"

Coding:

- 0: Representatives (reference category)
- 1: Good political decisions are based on the will of the people (populist orientation)
- 2: Good political decisions are based on independent expertise (technocratic orientation)

Variable: Basis of Political Decisions (Round 2)

Original Question: Q28_4

Category: Political Attitudes – Basis of Decision-Making

Variable Name: instidim2_round2

Description: This variable captures respondents' views on the foundation of good political decisions, distinguishing between the will of the people and independent expertise. It reflects populist versus technocratic attitudes towards decision-making in the second round.

Question Text:

"On what basis should good political decisions be made?"

Coding:

- 0: Representatives (reference category)
- 1: Good political decisions are based on the will of the people (populist orientation)
- 2: Good political decisions are based on independent expertise (technocratic orientation)

Variable: Basis of Political Decisions (Round 3)

Original Question: Q28_4

Category: Political Attitudes – Basis of Decision-Making

Variable Name: instidim2_round3

Description: This variable captures respondents' views on the foundation of good political decisions, distinguishing between the will of the people and independent expertise. It reflects populist versus technocratic attitudes towards decision-making in the third round.

Question Text:

"On what basis should good political decisions be made?"

Coding:

- 0: Representatives (reference category)
- 1: Good political decisions are based on the will of the people (populist orientation)
- 2: Good political decisions are based on independent expertise (technocratic orientation)

Variable: Temporal Focus of Policy (Round 1)

Original Question: Q28_5

Category: Political Attitudes – Temporal Focus

Variable Name: instidim3_round1

Description: This variable captures respondents' preferences regarding whether politics should primarily address the immediate demands of the people or focus on the long-term needs of the country. It reflects the temporal orientation in political decision-making for the first round.

Question Text:

"Should politics reflect the immediate demands of the people or the long-term needs of the country?"

Coding:

- 0: Representatives (reference category)
- 1: Politics should reflect the immediate demands of the people
- 2: Politics should reflect the long-term needs of the country

Variable: Temporal Focus of Policy (Round 2)

Original Question: Q28_5

Category: Political Attitudes – Temporal Focus

Variable Name: instidim3_round2

Description: This variable captures respondents' preferences regarding whether politics should primarily address the immediate demands of the people or focus on the long-term needs of the country. It reflects the temporal orientation in political decision-making for the second round.

Question Text:

"Should politics reflect the immediate demands of the people or the long-term needs of the country?"

Coding:

- 0: Representatives (reference category)
- 1: Politics should reflect the immediate demands of the people
- 2: Politics should reflect the long-term needs of the country

Variable: Temporal Focus of Policy (Round 3)

Original Question: Q28_5

Category: Political Attitudes – Temporal Focus

Variable Name: instidim3_round3

Description: This variable captures respondents' preferences regarding whether politics should primarily address the immediate demands of the people or focus on the long-term needs of the country. It reflects the temporal orientation in political decision-making for the third round.

Question Text:

"Should politics reflect the immediate demands of the people or the long-term needs of the country?"

Coding:

- 0: Representatives (reference category)
- 1: Politics should reflect the immediate demands of the people
- 2: Politics should reflect the long-term needs of the country

Variable: Political Conflict or Objectivity (Round 1)

Original Question: Q28_6

Category: Political Attitudes – Conflict vs. Objectivity

Variable Name: instidim4_round1

Description: This variable captures respondents' views on whether politics is primarily a moral struggle between good and evil or a domain for finding objective solutions. It reflects a binary perspective on political processes as either conflict-oriented or solution-oriented.

Question Text:

"Is politics ultimately a struggle between good and evil, or about finding objective solutions?"

Coding:

- 0: Representatives (reference category)
- 1: Politics is ultimately a struggle between good and evil
- 2: Politics is ultimately about finding objective solutions

Variable: Political Conflict or Objectivity (Round 2)

Original Question: Q28_6

Category: Political Attitudes – Conflict vs. Objectivity

Variable Name: instidim4_round2

Description: This variable captures respondents' views on whether politics is primarily a moral struggle between good and evil or a domain for finding objective solutions. It reflects a binary perspective on political processes as either conflict-oriented or solution-oriented.

Question Text:

"Is politics ultimately a struggle between good and evil, or about finding objective solutions?"

Coding:

- 0: Representatives (reference category)
- 1: Politics is ultimately a struggle between good and evil
- 2: Politics is ultimately about finding objective solutions

Variable: Political Conflict or Objectivity (Round 3)

Original Question: Q28_6

Category: Political Attitudes – Conflict vs. Objectivity

Variable Name: instidim4_round3

Description: This variable captures respondents' views on whether politics is primarily a moral struggle between good and evil or a domain for finding objective solutions. It reflects a binary perspective on political processes as either conflict-oriented or solution-oriented.

Question Text:

"Is politics ultimately a struggle between good and evil, or about finding objective solutions?"

Coding:

- 0: Representatives (reference category)
- 1: Politics is ultimately a struggle between good and evil
- 2: Politics is ultimately about finding objective solutions

Variable: State Compensation Preference (Round 1)

Original Question: Q28_7

Category: Economic Policy Preferences

Variable Name: policydim1_round1

Description: This variable captures respondents' preferences on state compensation for higher prices faced by companies and households. It reflects economic attitudes toward state intervention in market-driven price changes.

Question Text:

"Should the state compensate companies and households for higher prices?"

Coding:

- 0: Reference Category
- 1: The state should not have to compensate companies and households for higher prices
- 2: The state should fully compensate companies and households for higher prices

Variable: State Compensation Preference (Round 2)

Original Question: Q28_7

Category: Economic Policy Preferences

Variable Name: policydim1_round2

Description: This variable records respondents' views on state intervention in compensating for price increases in Round 2. It continues to measure attitudes toward economic state intervention.

Question Text:

"Should the state compensate companies and households for higher prices?"

Coding:

- 0: Reference Category
- 1: The state should not have to compensate companies and households for higher prices
- 2: The state should fully compensate companies and households for higher prices

Variable: State Compensation Preference (Round 3)

Original Question: Q28_7

Category: Economic Policy Preferences

Variable Name: policydim1_round3

Description: This variable captures Round 3 responses on state compensation preferences for price increases, examining consistency in economic intervention attitudes.

Question Text:

"Should the state compensate companies and households for higher prices?"

Coding:

- 0: Reference Category
- 1: The state should not have to compensate companies and households for higher prices
- 2: The state should fully compensate companies and households for higher prices

Variable: Integration Program Preference (Round 1)

Original Question: Q28_8

Category: Immigration Policy Preferences

Variable Name: policydim2_round1

Description: This variable measures respondents' attitudes towards the implementation of integration programs for immigrants. It reflects preferences for state-mandated integration versus no state-provided programs.

Question Text:

"Should the state provide integration programs for immigrants?"

Coding:

- 0: Reference Category
- 1: The state should provide no integration programs for immigrants
- 2: The state should make integration programs mandatory for immigrants

Variable: Integration Program Preference (Round 2)

Original Question: Q28_8

Category: Immigration Policy Preferences

Variable Name: policydim2_round2

Description: This variable captures respondents' views on state-mandated integration programs for immigrants in Round 2. It continues to assess attitudes on immigration integration policies.

Question Text:

"Should the state provide integration programs for immigrants?"

Coding:

- 0: Reference Category
- 1: The state should provide no integration programs for immigrants
- 2: The state should make integration programs mandatory for immigrants

Variable: Integration Program Preference (Round 3)

Original Question: Q28_8

Category: Immigration Policy Preferences

Variable Name: policydim2_round3

Description: This variable captures Round 3 responses on integration programs, showing consistency in opinions on immigration policy.

Question Text:

"Should the state provide integration programs for immigrants?"

Coding:

- 0: Reference Category
- 1: The state should provide no integration programs for immigrants
- 2: The state should make integration programs mandatory for immigrants

Variable: Environmental Action Preference (Round 1)

Original Question: Q28_9

Category: Climate Policy Preferences

Variable Name: policydim3_round1

Description: This variable captures Round 3 responses on integration programs, showing consistency in opinions on immigration policy.

Question Text:

"Should the state take action to reduce climate change?"

Coding:

- 0: Reference Category
- 1: The state should not take any action to reduce climate change
- 2: The state should take strong action to reduce climate change

Variable: State Environmental Action Preference (Round 2)

Original Question: Q28_9

Category: Climate Policy Preferences

Variable Name: policydim3_round2

Description: This variable captures respondents' preferences in Round 2 regarding the extent of state intervention in climate change mitigation, reflecting attitudes toward proactive or passive environmental policies.

Question Text:

"Should the state take action to reduce climate change?"

Coding:

- 0: Reference Category
- 1: The state should not take any action to reduce climate change
- 2: The state should take strong action to reduce climate change

Variable: Environmental Action Preference (Round 3)

Original Question: Q28_9

Category: Climate Policy Preferences

Variable Name: policydim3_round3

Description: This variable captures respondents' preferences in Round 3 regarding the extent of state intervention in climate change mitigation, reflecting attitudes toward proactive or passive environmental policies.

Question Text:

"Should the state take action to reduce climate change?"

Coding:

- 0: Reference Category
- 1: The state should not take any action to reduce climate change
- 2: The state should take strong action to reduce climate change

Variable: Religious Symbol Regulation Preference (Round 1)

Original Question: Q28_10

Category: Public Policy on Religious Symbols

Variable Name: policydim4_round1

Description: This variable captures respondents' attitudes toward the state's role in regulating religious symbols in public spaces. It reflects preferences between unrestricted display, regulation, or a ban, providing insight into public opinions on religious expression in shared civic spaces.

Question Text:

"Should the state impose regulations on the display of religious symbols in public spaces?"

Coding:

- 0: Reference Category
- 1: The state should not constrain religious symbols in the public space
- 2: The state should ban religious symbols from the public place

Variable: Religious Symbol Regulation Preference (Round 2)

Original Question: Q28_10

Category: Public Policy on Religious Symbols

Variable Name: policydim4_round2

Description: This variable captures respondents' attitudes toward the state's role in regulating religious symbols in public spaces during Round 2. It reflects preferences between unrestricted display, regulation, or a ban, providing insight into public opinions on religious expression in shared civic spaces.

Question Text:

"Should the state impose regulations on the display of religious symbols in public spaces?"

Coding:

- 0: Reference Category
- 1: The state should not constrain religious symbols in the public space
- 2: The state should ban religious symbols from the public place

Variable: Religious Symbol Regulation Preference (Round 3)

Original Question: Q28_10

Category: Public Policy on Religious Symbols

Variable Name: policydim4_round3

Description: This variable captures respondents' attitudes toward the state's role in regulating religious symbols in public spaces during Round 3. It reflects preferences between unrestricted display, regulation, or a ban, providing insight into public opinions on religious expression in shared civic spaces.

Question Text:

"Should the state impose regulations on the display of religious symbols in public spaces?"

Coding:

- 0: Reference Category
- 1: The state should not constrain religious symbols in the public space
- 2: The state should ban religious symbols from the public place

Variable: Political Party Affiliation

Original Question: Q51

Category: Political Affiliation

Variable Name: party_close

Description: This variable records the respondents' affiliation or closeness to specific political parties. Respondents were asked if they feel particularly close to any political party, and they could select one or multiple parties based on the political landscape of their respective country.

Question Text:

"Do you consider yourself to be particularly close to any particular political party? If so, which party do you feel close to? You may select one or multiple parties."

Coding: Open-ended, with a predefined list of political parties per country. Each country's party list was tailored to include only parties relevant to that specific country.

Variable: Political Party Distance

Original Question: Q52

Category: Political Affiliation

Variable Name: party_distant

Description: This variable records the respondents' sense of distance or opposition toward specific political parties. Respondents were asked if they feel particularly distant from any political party, and they could select one or multiple parties based on the political landscape of their respective country.

Question Text:

"Do you consider yourself to be particularly distant to any particular political party? If so, which party do you feel distant to? You may select one or multiple parties."

Coding: Open-ended, with a predefined list of political parties per country. Each country's party list was tailored to include only parties relevant to that specific country.

Variable: Perceived Division among Political Parties

Original Question: Varies per country

Category: Perceived Social and Political Division

Variable Name: divparty

Description: This variable captures respondents' perceptions of the current level of division among political parties in their country. It provides insight into how fragmented or polarized the political landscape is perceived to be by the public.

Question Text:

"How divided are political parties these days?"

Coding:

- 1: Not at all divided
- 2: Somewhat divided
- 3: Very divided
- 4: Extremely divided

Variable: Perceived Division among Citizens (Country-specific)

Original Question: Varies per country

Category: Perceived Social and Political Division

Variable Name: divciti

Description: This variable captures respondents' views on how divided the citizens of their country are, reflecting general societal cohesion or fragmentation. It assesses the perceived unity or discord within the society.

Question Text:

"Generally speaking, how divided are the citizens of [country] these days?"

Coding:

- 1: Not at all divided
- 2: Somewhat divided
- 3: Very divided
- 4: Extremely divided

Variable: Perception of Household Economic Situation

Original Question: Varies per country

Category: Economic Perceptions – Household Level

Variable Name: owneco

Description: This variable captures respondents' perceptions of their household's financial situation compared to 12 months ago. It reflects personal economic assessments over a one-year period, indicating perceived improvement or deterioration in household finances.

Question Text:

"How does the financial statement of your household now compare with what it was 12 months ago?"

Coding:

- 1: A lot worse
- 2: A little worse
- 3: The same
- 4: A little better
- 5: A lot better

Variable: Perception of National Economic Situation

Original Question: Varies per country

Category: Economic Perceptions – National Level

Variable Name: countryeco

Description: This variable captures respondents' perceptions of the overall economic situation in their country compared to 12 months ago. It reflects views on national economic trends, allowing for a broader assessment of the country's economic health over the past year.

Question Text:

"How do you think the general economic situation in [country] has changed over the last 12 months?"

Coding:

- 1: A lot worse
- 2: A little worse
- 3: The same
- 4: A little better
- 5: A lot better

Variable: Perceived Understanding of Political Issues

Original Question: Varies per country

Category: Political Efficacy – Self-Perception

Variable Name: eff1

Description: This variable assesses the respondent's confidence in their ability to understand and evaluate important political issues within their country. Higher scores indicate stronger agreement with their perceived ability to understand politics.

Question Text:

"I can understand and evaluate important political issues about [country]."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Perceived Political Representation

Original Question: Varies per country

Category: Political Efficacy – External Perception

Variable Name: eff2

Description: This variable measures the extent to which respondents feel that politicians in their country care about people like them. It captures external political efficacy, reflecting the perceived responsiveness of politicians.

Question Text:

"The politicians in [country] care about what people like me think."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Perceived Influence on Government Actions

Original Question: Varies per country

Category: Political Efficacy – Perceived Influence

Variable Name: eff3

Description: This variable captures the perception of individuals regarding their influence over government actions. A higher score suggests a stronger belief that people like them have no say in what the government does.

Question Text:

"People like me don't have any say about what the [country's] government does."

Coding:

- 1: Strongly disagree
- 2: Disagree
- 3: Somewhat disagree
- 4: Neither agree nor disagree
- 5: Somewhat agree
- 6: Agree
- 7: Strongly agree

Variable: Political Interest

Original Question: Varies per country

Category: Political Engagement

Variable Name: polint

Description: This variable assesses the respondent's self-reported level of interest in politics, providing insight into political engagement levels.

Question Text:

"How interested would you say are you in politics?"

Coding:

- 1: Very interested
- 2: Somewhat interested
- 3: Not very interested

Variable: Education Level

Original Question: Varies per country

Category: Education Background

Variable Name:edulvl

Description: This variable captures the total years of formal education completed by the respondent.

Question Text:

"How many years of full-time education have you completed?"

Coding:

- 1: 0 Years
- 2 to 23: 1 to 22 Years
- 24: 23 or more Years

Variable: Self-Perceived Social Class

Original Question: Varies per country

Category: Social Class Identification

Variable Name: class

Description: This variable captures the respondent's self-identified social class, reflecting socioeconomic status.

Question Text:

"Do you see yourself and your household belonging to...?"

Coding:

- 1: The working class of society
- 2: The lower middle class of society
- 3: The middle class of society
- 4: The upper middle class of society
- 5: The higher class of society
- NA: Not applicable

Variable: Area of Residence

Original Question: Varies per country

Category: Geographic Demographics

Variable Name: area

Description: This variable describes the type of area in which the respondent lives, distinguishing between urban and rural settings.

Question Text:

"Would you say you live in a...?"

Coding:

- 1: Rural area or village
- 2: Small or middle-sized town
- 3: Large town
- NA: Not applicable

Variable: Religious Affiliation

Original Question: Varies per country

Category: Religious Identification

Variable Name: relig

Description: This variable identifies the religious denomination, if any, to which the respondent belongs.

Question Text:

"Do you belong to a religion or religious denomination? If yes, which one?"

Coding:

- 1: I do not belong to a denomination
- 12: Roman Catholic
- 13: Church of Ireland
- 14: Other Protestant
- 15: Orthodox
- 16: Other Christian denomination
- 17: Jewish
- 18: Islam
- 19: Eastern religions
- 20: Other non-Christian religions
- 21: Other
